Profit Margin	39.62
Return On Equity	27.9

Next, in the column on the left, under **Dashboard** click the **Events** button. You'll be taken to the **Events** page below. It will be empty, so let's create an Event!

Click the **Create New Event** button seen above. You'll see the following page, where you can type **Apple** in the box below the **Symbol Search** field in the header.

Note: This field requires 3 characters to autocomplete, so if you don't know the exact stock symbol (**AAPL**) you can type the entire company name and you'll be able to pick it from the list.

You will be given an autocomplete list of stocks to pick from. After you select your stock symbol, AAPL we can create our alert.

Price Change Alert: “has its price change by more than ...”

When you want to know when a stock changes by a large amount, either up or down in a single trading day, you can get the percent you want to get notified about here. I only want to be notified on major change for Apple, so I will pick **5** percent.

The screenshot shows the 'Tulip Screener' interface. The left sidebar contains navigation links: Dashboard, Events, Watchlists, Screeners, My Profile, Feedback, RECENT (My first screener, Yet another screener), and TERMS (Privacy Policy, Terms of Use). The main content area is titled 'When' and features a search bar with 'AAPL' entered and the instruction '(select a listed security)'. Below this is a text input field containing 'has its price change by more than...'. A 'Percent:' label is followed by a dropdown menu currently set to '5'. Underneath is a 'Notify me via' section with an 'Email' input field. A teal 'CREATE EVENT' button is located at the bottom right of the main area.

Keep the email notification option for now for this tutorial. We’re always working on more notification types, if you don’t see a notification option you want, let us know what you want! We’ll see what we can do :)

Next, we'll show the **Price Less Than Alert** "has a price less than or equal to":

This alert is good for when you think a stock is too expensive and you want to buy at a cheaper price.

Below, you'll see we picked the price of \$180 to get our alert. When Apple hits that price on the stock market, our robots will let us know via email alert. If I want to buy at \$180, I would get this alert, look over the stock, and then go to my brokerage account and create a limit order to buy it.

The screenshot shows the 'Tulip Screener' interface. On the left is a navigation sidebar with options: Dashboard, Events, Watchlists, Screeners, My Profile, and Feedback. Below these are sections for 'RECENT' (My first screener, Yet another screener) and 'TERMS' (Privacy Policy, Terms of Use). At the bottom of the sidebar is 'SPY'. The main area has a 'Symbol Search' bar at the top. The 'When' section contains a dropdown menu with 'AAPL' selected and the text '(select a listed security)'. Below this is a text input field with the value 'has a price less than or equal to...'. The 'Price:' label is followed by a numeric input field containing '180'. The 'Notify me via' section has a dropdown menu with 'Email' selected. A green 'CREATE EVENT' button is located at the bottom right of the main area.

Next, we'll show the **Price Greater Than Alert** "has a price greater than or equal to":

This alert is good for when you bought a stock and want to sell it for this price, maybe \$200. You'll get the alert from TulipScreener and then you can decide if you want to sell or not.

Below, you'll see we picked the price of \$200 to get our alert. When Apple hits that price on the stock market, our robots will let us know via email alert. You will get this alert and then you can decide what to do!

The screenshot shows the Tulip Screener interface. On the left is a navigation sidebar with links for Dashboard, Events, Watchlists, Screeners, My Profile, and Feedback. Below these are sections for RECENT (My first screener, Yet another screener), TERMS (Privacy Policy, Terms of Use), and a search bar. The main content area is titled "When" and contains a form for creating an alert. The form includes a dropdown menu for "AAPL (select a listed security)", a text input for "has a price greater than or equal to...", and a "Price:" label followed by a text input containing "200". Below this is a section titled "Notify me via" with a text input for "Email". At the bottom right of the form is a green "CREATE EVENT" button.

Below you'll see our **Greater Than Event** event in the **Events** page (<https://www.tulipscreener.com/events>). You can visit this page and edit or delete these alerts at any time.

AAPL	Price goes above \$200.00	Email		
------	---------------------------	-------	---	---

Next, we'll show the **Volume Greater than 30 Day Average Event** "has volume 30% above the 30 day average":

Shown below, this event will tell you when a stock is significantly above normal volume (the number of trades that have happened between buyers and sellers of stock) for the day, and you can check your preferred stock news choice, such as Reuters (<https://www.reuters.com/finance/stocks/company-news/AAPL.OQ>) to see if any significant news has happened that has increased trading volume. If you subscribe to both company alerts and an alert for **SPY**, one of the most traded index funds, you'll see if it's just a high market volume day in general because of fear or excitement or bigger scale news examples including Federal Reserve interest rate increases or trade war tensions between China in and the United States.

This event comes in very useful if you want to know when big news happens for your favorite stocks.

The screenshot shows the Tulip Screener interface. On the left is a navigation sidebar with the following items: Dashboard, Events, Watchlists, Screeners, My Profile, Feedback, RECENT (My first screener, Yet another screener), TERMS (Privacy Policy, Terms of Use). The main content area has a search bar at the top with the text "Symbol Search". Below the search bar, the "When" section is active, showing a dropdown menu with "AAPL" selected and the text "(select a listed security)". Below this, the event description "has volume 30% above the 30 day average" is displayed. The "Notify me via" section has an "Email" input field. At the bottom right of the main content area is a teal "CREATE EVENT" button.

Next, we'll show the **Upcoming Earnings Call Event** "has an upcoming earnings call":

Profits are the underlying reason to invest in companies, and earnings calls are when companies announce their profits. These calls happen quarterly (every 3 months) and when they happen, if they are lower or higher than analysts expect. You can find future earnings expectations here (<https://www.reuters.com/finance/stocks/analyst/AAPL.O>) on the right side. You can see the **Future Estimates** at the bottom.

Here we are subscribed to alerts about Apple earnings calls.
